-Immunocidin Equine infused three times

Immunocidin® Equine:

- ✓ a standalone treatment that directs the immune system to fight sarcoid tumors
- ✓ USDA- and CFIA-approved for intratumoral infusion (the only approved sarcoid therapy)
- ✓ manufactured using cell wall fraction from a naturally occurring mycobacterium
- ✓ effective in stimulating the innate and specific immune responses and inducing apoptosis in tumor cells
- ✓ safe for use in pregnant mares and well-tolerated in older horses
